

Take a sneak peek at our BAT presentation!

Bats

This program includes:

- *Types of bats
- *Bats are mammals
- *Echolocation
- *Habitats
- *Myths/Truths

Townsend Big-Eared

Insect-eating Bats

Fruit Bats

Vampire

Meat-eating bats

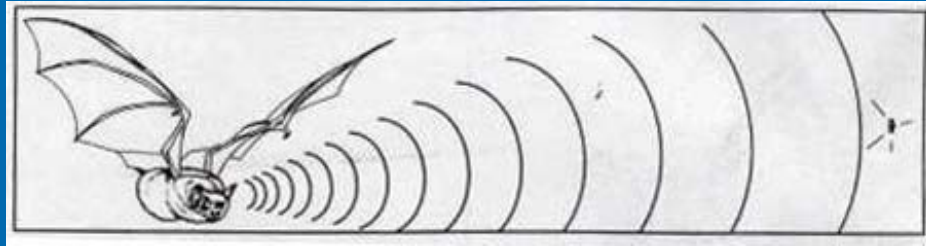

Do you think bats are more like birds, mice, or humans?

- Birds and bats both fly but birds are not mammals.
- Mice are mammals.
- Humans are mammals.
- Bats are mammals.

How do bats fly in the Dark?

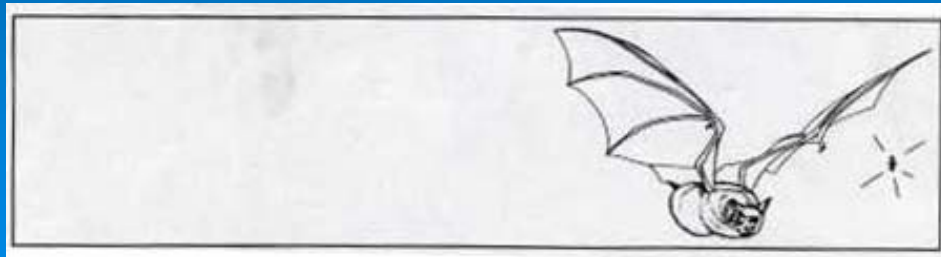

Most bats use **echolocation** to navigate in the dark and find food

- The bats make squeaks and clicks.

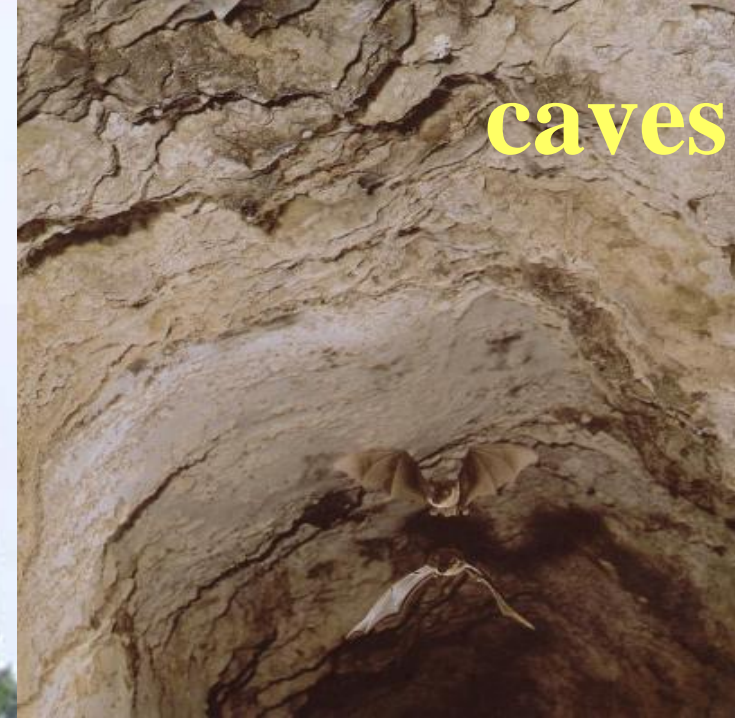

- The sound bounces off of trees, insects, and other objects.

- The bat can tell how big the object is, how far away it is, and which direction to fly to get to it.

**Where do
bats live?**

caves

cities

forests

*Bats eat bugs
They don't eat people
Bats eat bugs
They don't fly in your hair
Bats eat bugs
They don't eat people
And that's what they're doing
Flying up there*
